Are you sure your  
Backups are Usable?

# MANAGED BACKUP

## KEY FEATURES

### Block Level Infinite Incremental Backup

I2 Technology™ means never having to do another full backup, drastically reducing the backup time, storage space, network traffic, and workload of your servers.

### Recover Your Data to Dissimilar Hardware

CBE can perform a bare metal restore of your data to dissimilar hardware. You don't have to worry about purchasing that new server anymore!

### Virtual Server Support

Backup your virtual servers with the same software that you use to back up your physical servers.

### Supreme Flexibility

Recover your data from nearly any point in time, whether it is just one file or a full restore.

### Full Transparency through Reporting

Wide range of detailed reports are provided monthly to ensure that you know what is happening and that you can breathe easy knowing that your data is protected.

### Fully Managed System

We monitor the software to ensure it is always working, and will act immediately if there is an issue.

## THREATS FACING SMB's TODAY

- Loss of Data
- Failed Restores
- Costly Upkeep
- Unreliable Systems
- Compliance
- Cost of Downtime

**"75% of small and midsize businesses rank data loss as the most significant risk to their business."** – *Applied Research*

## REDUCING THE COST OF DATA ASSURANCE

### What would be the cost to your business if you lost your critical data?

Your business data is the lifeblood of your company and the amount you are collecting and storing is growing all the time. Imagine the impact if you lost a day's data, a week's data, a year's data, due to inadequate or infrequent back-up processes. What would happen, could you recover?

A managed backup service from CBE ensures that all files are automatically backed up as frequently as every 15 minutes if needed. And it will likely cost less than your monthly phone bill. So, how much is **your** data worth?

### Benefits of Managed Backup

- **Low Cost of Ownership**  
A fully managed data backup and restore solution for the same or less than a capital purchase that you have to manage yourself.
- **Total Peace of Mind**  
Thanks to centralized management and monitoring by our NOC team, you can rest assured that your business data is safe and being handled by experts. Which means you can focus on your business
- **Reduce Your Day-to-Day Operating Costs**  
While most solutions require full backups periodically or in some cases daily, our solution only requires an initial full backup then from that point stores only incremental file changes. Saving you money in storage space, data transfer costs and server load.
- **Safeguard Business Information**  
Since the solution takes backups in terms of changes, you will be able to recover files, even older revisions.
- **Ensure Business Continuity**  
Backup your most critical business applications to ensure that you can get quick access to restore systems that would have the most impact to your day-to-day operations if they were down.
- **Increase Productivity and Decrease Downtime**  
With our rapid restore capabilities, we will minimize the costs associated with lost productivity and downtime.
- **Detailed Reporting Information**  
No longer will you be unsure of how well your data is protected. We will provide you with reports monthly that let you know that your data is safe!

## Device Lifecycle Management

### Managed Backup is Vital

CBE provides complete management for all of your systems.

Managed Backup is so important but it is also critical to keep your systems operating at maximum efficiency all the time.

Ask your CBE representative to discuss Complete Protection for your total environment.

## Why our clients choose our Managed Backup Solution

### Reduced Costs

- Less storage space required
- Less bandwidth needed
- Recover to dissimilar hardware if needed

### Improved Productivity

- Back up more data in less time
- Minimize downtime with faster restore times

### Increased Awareness

- Centralized NOC Management and Monitoring by our FRC engineering team
- Detailed monthly reports on backup status

### Increased Confidence

- Regular backups minimize business downtime in the event of a data loss
- Backups are always scheduled and managed by experts

Features		Remote Backup Manager
Initial Data Assessment and Plan	Included	Our engineers will assess your critical data and develop a comprehensive backup plan that protects your critical data.
Disk Based Backup Deployment and Configuration	Included	Installation of our enterprise class disk based backup and recovery software.
Monthly Backup Capacity and Performance Reporting	Included	Regular reporting demonstrating the effectiveness of the backup solution and ensuring efficient use of resources.
Monitored and Managed by our Network Operations Center	Included	Our team of NOC engineers work in the background to ensure backups are successful and critical data is protected.
Remote Backup to Cloud	Option	Important files and folders are stored in the cloud in case of critical failure.
Data Center Replication and Disaster Recovery Planning	Option	Advanced Disaster Recovery options are available to eliminate the risk of data loss and protect your business.
Essential Support <ul style="list-style-type: none"> <li>• Attended and Unattended remote control for additional support</li> <li>• Asset Discovery and Reporting</li> <li>• Device Health Monitoring</li> </ul>	Value Added Service	Our NOC team is available to assist with all your support needs, delivering support remotely and actively monitoring your systems for critical failure.
